CYBERNETICS

Volume 4, Numbers 1-6, 1968

CYBERNETICS

A translation of *Kibernetika*

Volume 4, Number 1 January-February, 1968

CONTENTS

	Eng./Russ.	
The Reliability of Discrete Automata—V. G. Lazarev, E. I. Piil, and E. N. Turuta	1	1
The Minimization of Schemes on a Majority Basis—L. Ya. Rozenblyum	7	8
The Structure of, and Fundamental Operations for, Computer Memories Designed for the Solution of Nonarithmetic Problems—A. A. Yakuba	12	14
Equivalent Transformations for Address Algorithm Schemes—V. N. Porshneva	16	19
An Analysis of External Merge Sorting Techniques—L. S. Lozinskii	21	25
Search Mechanisms in Large Arrays of Variable Information—V. P. Cherenin	29	36
Linear Differential Games—B. N. Pshenichnyi	37	47
Nonlinear Programming with Random Constraints—K. A. Tinn and E. Kh. Tyugu	42	54
Games on the Sum of Graphs—L. P. Varvak	49	63
Speech Discrimination by Dynamic Programming—T. K. Vintsyuk	52	81
Defining Relations in a Two-Adder Operational Device—V. M. Glushkov	58	89
Method of Random Walk for the Two-Stage Problem of Stochastic Programming and Its Generalization—Yu. M. Ermol'ev and N. Z. Shor	59	90
Distribution of Flow Under Hazardous Conditions—K. M. Berestovenko and I. M. Mel'nik	61	92
On Error Estimation in Measuring the Root Mean Square Value of a Random Process—V. I. Chaikovskii	62	93
Optimization of the Functionals of Given Statistical Models with Linear Constraints—V. A. Starosel'skii	64	95
Principles of the Realization of Analytic Transformations on a Machine —T. A. Grinchenko	65	97
Interaction of Learning and Self-Learning in Pattern Recognition —M. I. Shlezinger	66	98
Equivalence in a Class of Address Algorithms—V. I. Malinovskii	66	98
A Nonlinear Differential Game—E. N. Simakova	67	98

CYBERNETICS

A translation of *Kibernetika*

Volume 4, Number 2 March-April, 1968

CONTENTS

	Eng./Russ.	
Completeness of a System of Operations in Digital Computers —V. M. Glushkov	1	1
Theory of Probabilistic Automata—R. G. Bukharaev	5	6
Stability of Probabilistic Automata—B. S. Kochkarev	19	24
Method of Transformation of the Observation Space in the Statistical Synthesis of Nonlinear Closed Automatic Systems. II.—V. I. Ivanenko	25	31
System of Automation of Programming for Analog Machines (SAPAM) —A. Kh. Bereslavskii and G. S. Gol'denberg	29	36
Some Problems in the Theory of Network Planning—Yu. P. Krivenkov	37	45
Analysis of Circuits with Piecewise-Linear Elements—L. V. Danilov	43	53
The Values of a Linear Form on a Set of Permutations—D. A. Suprunenko	48	59
Minimum of a Linear Form on the Set of All Complete Cycles of the Symmetric Group S_n—V. S. Aizenshtat and D. N. Kravchuk	52	64
The Method of Penalty Functions—V. V. Ivanov and V. E. Truten	54	67
Simulation of Thought Processes—N. M. Amosov	57	70
The Interaction of Learning and Self-Organization in Pattern Recognition —M. I. Shlezinger	66	81
Two-Stage Optimal Recognition Systems—L. A. Tel'ksnis	72	89
Solution of Dynamic Information Problems of Types I and II on the Ural-4 Digital Computer. Control of the Progress of Freight Shipments —V. P. Cherenin, V. V. Rodionov, and M. S. Il'bin	75	93
BRIEF COMMUNICATIONS		
The Number of Incomplete Colorings of the Vertices of a Graph—Kh. N. Narzullaev	81	100
Representatives of Functions of k-Valued Logic By Polynomials mod k —N. N. Aizenberg	83	102
A Class of Immediate-Constituent Grammars—L. G. Samoilenko	84	102

CYBERNETICS

A translation of *Kibernetika*

Volume 4, Number 3 May-June, 1968

CONTENTS

	Eng./Russ.	
Synthesis of an Automaton by a Set of Microprograms—A. N. Chebotarev	1	1
Conditions for the Existence of Diagnostic Tests—A. M. Bogomolov and V. A. Tverdokhlebov	8	9
A Construction of an Automaton Which is Asymptotically Optimal in a Stationary Random Medium—G. S. Kleimenova and V. I. Mudrov	17	20
The Formal Synthesis of an Automaton by a Microprogram. I —A. T. Mishchenko	20	24
A Method of Synthesizing an Autonomous Stochastic Automaton—V. M. Chentsov	27	32
Vector-Time Switching Functions (VTS-Functions) as a Language for Describing Information Processing Circuits and Systems. I —Z. L. Rabinovich	31	36
Evaluation of Reliability by the Methods of the Theory of Optimal Equations —G. D. Kartashov	37	43
Detection of Signals with Random Amplitude—A. N. Demenin	41	47
Optimal Controls Minimizing the Extremum of a Function of Phase Coordinates —A. G. Kuznetzov and F. L. Chernous'ko	43	50
Algorithms for the Solution of the Two-Stage Problem in Stochastic Programming —N. Z. Shor and M. B. Shchepakin	48	56
Predicate Description of Domains of Complex Form—V. L. Rvachev and L. I. Shklyarov	51	59
Extrapolation and Filtration of Markov Processes. Part I —R. Sh. Aiptser	55	63
An Approach to the Construction of Adaptive Teaching Systems—G. A. Ball, T. Gergei, and A. M. Dovgyallo	61	71
Determination of the Diagnostic Value of Features—I. A. Birger	69	80
BRIEF COMMUNICATIONS		
Strong Equivalence of Categorial and Dominational Grammars —M. I. Beletskii	74	92
Compatible Majority Decomposition—V. I. Varshavskii	75	93
The Problem of Completeness in a Class of Moore Automata—M. A. Spivak	76	95
Metrically Complete Systems of Automata—F. Gécseg	78	96
The Rate of Convergence of the Generalized Gradient Descent Method —N. Z. Shor	79	98
Problems of Completeness in Boolean Function Algebras—G. E. Tseitlin	80	99
Letter to the Editor—V. I. Ivanenko	82	100

CYBERNETICS

A translation of *Kibernetika*

Volume 4, Number 4 July-August, 1968

CONTENTS

	Eng./Russ.	
Syntax and Semantics of Formal Languages—A. A. Letichevskii	1	1
Behavior of an Automation with Selective Tactics in Stationary Random Media —V. Ya. Valakh	8	10
Automata with a Final Cycle-Free State which Are Optimal in Terms of Average Response—Yu. G. Shukuryan	12	15
Synthesis of Closed Adaptive Systems Controlling Stationary Objects—V. I. Ivanenko	18	21
Vector-Time Switching Functions as a Language for Describing Information Processing Circuits and Systems. II—Z. L. Rabinovich	22	25
Use of the Symmetry Concept in Synthesizing Networks Using Threshold Elements —V. V. Litvinov, O. M. Ryakin, and N. G. Sabadash	30	35
Stability of Piecewise-Linear Aggregates—V. V. Kalashnikov	34	39
A Meta-Algorithmic Language—V. F. Turchin	40	45
Equivalent Transformations of Address Algorithm Schemes. II—V. N. Porshneva	48	55
Operator Schemes on a Common and Distributed Memory—A. P. Ershov	55	63
Hamiltonian Cycles of a Connected Graph—L. M. Likhtenbaum	62	72
Remarks on Tarry's Method of Calculating Eulerian Cycles—V. S. Shishov and Ho Ba Thuan	65	76
The Densest Coverage of a Strip by Figures of Complex Geometric Shape. I —A. G. Glushko, V. L. Rvachev, and Yu. G. Stoyan	69	81
The Problem of Inventory Control with an Unknown Demand Parameter Distribution —Yu. I. Ryzhikov	73	85
Different Types of Equivalence of Dominational Grammars—M. I. Beletskii	80	91
BRIEF COMMUNICATIONS		
Efficient Arrangement of Information Files on Magnetic Tape—V. A. Niesov	84	96
Computer Plotting and Calculation of Complete Occurrences—V. S. Skarynkin and R. G. Strongin	86	99
Direct Methods of Solving some Stochastic Programming Problems—Yu. M. Ermol'ev and A. D. Tuniev	88	100
Integration Algorithm in the Language Analitik—V. G. Bodnarchuk and Yu. S. Fishman	90	102
The Conveyor Principle of Information Processing (Summary)—A. G. Kukharchuk, G. V. Reutov, and G. M. Lutsii	90	103

CYBERNETICS

A translation of *Kibernetika*

Volume 4, Number 5 September-October, 1968

CONTENTS

	Eng./Russ.	
Simple Algorithms for the Analysis and Synthesis of Pushdown Automata —V. M. Glushkov	1	1
Hybrid Quasi-Analog Systems—G. E. Pukhov	10	10
Formal Synthesis of an Automation by a Microprogram. II—A. T. Mishchenko	17	21
A Problem Connected with Systems of Distinct Representatives—A. N. Chebotarev	23	28
The Equivalence Problem in One Class of Address Algorithms—V. I. Malinovskii	27	33
Correction of Breaks in Gate and Contact Circuits—E. I. Nechiporuk	32	40
Approximation by Piecewise Functions and the Problem of Classification—A. A. Alekseev	39	49
Allowing for Reliability of the Initial Data in Computer Solution of Probability Problems —N. A. Shishonok and S. A. Senetskii	43	54
Simultaneous Calculation of the Numbers of Incomplete Colorings and Partial Contractions of a Graph—A. A. Zykov	46	58
Functional Stability of Aggregate Systems—V. V. Kalashnikov	49	63
The Problem of Complex Decisions (Formulation and Approaches)—E. I. Vilkas and E. Z. Maiminas	53	68
Iterative Method of Solving Games with Inaccurate Information Transmission —V. A. Lindenbaum and I. V. Romanovskii	58	74
A Connected Extremum Problem for a Linear Stieltjes Functional—S. A. Kas'yanyuk	62	79
Detection of Disorder in a Bivariate Random Process—B. S. Darkhovskii	66	84
BRIEF COMMUNICATIONS		
Modification of the "Branch-and-Bound" Method with Branching along Generalized Characteristics—R. M. Reidman	72	98
Calculating Circuit Functions for a Class of Radio-Electronic Circuits—V. P. Sigorskii, V. F. Lisitsa, Yu. M. Kalnibolotskii, and L. S. Simonenko	73	99
Possible Utilization of a Computer to Calculate the Number of Graphs—A. E. Yurtsun and V. M. Moroz	74	100
Multiplication by an Operating Unit Based on the Conveyor Principle of Data Processing —A. G. Kukharchuk, G. M. Lutskii, and G. B. Reutov	76	102

CYBERNETICS

A translation of *Kibernetika*

Volume 4, Number 6 November-December, 1968

CONTENTS

	Eng./Russ.	
Selecting a Set of Programs to Solve Systems of Linear Algebraic Equations on Computers of the "Mir" Series – V. M. Glushkov, I. N. Molchanov, and L. D. Nikolenko	1	1
Using Normal Codes in State Assignment for Abstract Automata – E. A. Vartapetov	7	7
Automorphisms of the Unions of Direct Products of Finite Graphs – E. G. Davydov	16	16
Response Time and Accuracy of Digital Integrators as Functions of the Stieltjes Numerical Integration Formulas – A. V. Kalyaev	25	23
Solving the Problem of Linear Fractional Programming – V. I. Klevachev	31	27
Semistochastic Methods of Solving Convex Programming Problems – S. V. Zhak	38	32
Synthesis of an Optimal Adaptive Control System by a Gaussian Random Process Generator – V. I. Ivanenko, O. A. Khokhel', and E. I. Shor	46	38
The "Assembly-Line" Principle of Information Processing – A. G. Kykharchuk, G. V. Reutov, and G. M. Lutskii	53	43
Transformational Properties of Complex Relatively Isolated Systems – V. G. Vasil'ev	61	50
Analysis of Some Schemes for Monitering a Poisson Process – N. V. Andreev	71	59
Ergodic Properties of a Multichannel Queueing System with a Constraint – L. G. Afanas'eva and A. V. Martynov	76	62
Extrapolation and Filtration of Some Markov Processes. II – R. Sh. Liptser	86	70
The Extremum of a Linear Form on the Set of All Cyclic Substitutions of Degree n – V. S. Aizenshtat and D. N. Kravchuk	94	76
Going in the Limit to Diffusion in a Special Variant of the Gambler's Ruin Problem – A. A. Yushkevich	101	82
One Problem Involving Determination of an Optimum Procedure for Setting up a Machine – Yu. A. Zak	107	86
Choice of the Optimal Dynamic Conditions of Irradiation of Malignant Tumors – Yu. A. Oleinik-Ovod and L. Ya. Klepper	115	93
The Problem of Minimizing the Sum of Penalties in Scheduling – G. K. Kladov and E. M. Livshits	124	99
